To whom it may concern

Dear Sir/Madam,

We are an established company in security training. Our programs are WSQ/WDA certified.

We have been wanting to move some of our training programs onto an eLearning environment to make it easier for our clients and students to access, and also for us to scale our business. We were having no success in dealing with a number of technology companies is trying to do this.

We recently met Genashtim Innovative Learning Pte Ltd through the IAL, as their Founder Thomas Ng was running a workshop there. Being in online education themselves, they seem to understand our needs.

We had a couple of discussions with them, and then in a very short time, they managed to take a part of one of our training programs, and load it on to a Moodle platform. It had our content, with some added interactive tools like tests and surveys. They also incorporated videos, and also a discussion board for interaction between the instructor and the students, and also among the students.

We are confident that Genashtim is able to help us achieve our goals and objectives with regard to eLearning, and we are in the process of applying for funding from SPRING to proceed with this.

Should you require any further clarifications, please feel free to contact me at.....

Yours sincerely,

David Chow
